Life is Possible – 生命教育 手機程式工作坊

Lecture 07 - Project Week 1

Project details Planning:

Here are some tips for your planning:

1. Determine the `Project topic` first

2. Then think about the `features` (what we need in our PWA)

3. Think about the style and theme

4. Determine what `pages` we need to have and WHO work on it

5. Open a Gituhb repository and invite all groupmates.

6. Open those blank `pages` / `folder` / `file` first and have a git push.

7. Other groupmates `git pull` the file and start working.

Showcase

Showcase

Each group will deploy the PWA in `vercel` and others can be able to access the site.

We will have a presentations section at the last lecture.

Each group will have a 4-8 minutes time to present the PWA to others.

Showcase - presentations

- **Members**: Suggested all members should attend the presentations

- **Time**: 4-8 minutes

- **Content**: Features of the PWA, what can others to do on the PWA ...

- **Others**: PPT is not a must
